TECHNICAL SKILLS

Programming: Python, R, SQL, | **AI/ML Frameworks:** TensorFlow, PyTorch, Scikit-learn, LangChain | **Data Tools:** Pandas, NumPy, Tableau, MySQL, PostgreSQL, pgAdmin | **Cloud Platforms:** AWS, Azure, GCP

WORK EXPERIENCE

❖ Machine Learning Engineer | Tata Consultancy Services (TCS)

January 2023 - May 2025

- Consulted and deployed impactful AI/ML solutions for TCS's Edtech platform, including GPT-3.5-powered RAG chatbots, Llama 3-based AI agents for ticket automation, and Web Scraping/OCR tools, benefiting over 600,000 associates globally.
- Designed AI/ML coding assessments for 10k+ associates quarterly, driving career advancements through promotions.
- Enhanced developer productivity by automating redundant manual tasks using Generative AI, reducing effort by 30%.
- Led deep-skilling bootcamps on Generative AI, LLMs, AI/ML, and Python, increasing platform engagement metrics (Learning-Hours) by 13% in FY24.

❖ Data Analyst | Tata Consultancy Services (TCS)

July 2021 - April 2022

- Developed a unified SQL database and Tableau dashboard for program data analysis and automated recommendation mailers using Python, reducing manual effort by around 50%.
- Analyzed platform data and implemented insights which boosted talent development program engagement by 11% in FY22.
- Received 'On the Spot' award for delivering innovative insights from past enrollment data and candidate interviews, driving improved program registrations and outreach.

PROJECTS

❖ Deepfake Classification using Transformers:

- Developed a CNN and Transformer based Image Classifier and Captioning model that can differentiate between AI and human-generated images with 92% accuracy and generate descriptions as part of a Global Hackathon challenge.

❖ Ticket Automation using Generative AI Agent:

- Presented a POC and implemented an MVP for support ticket automation within TCS using open-source LLM models and agentic frameworks which helped eliminate redundant efforts, saving over five hours per week.

❖ Analysis of Telecom Customer Churn during Pandemic Period

- Analyzed and predicted the impact of the COVID-19 pandemic on a regional telecom operator using Machine Learning algorithms, enabling a 35% increase in quarterly revenue by retaining high-value clients at risk of churning.

EDUCATION

❖ MEng, Industrial Engineering | University of Toronto, Canada

September 2025- Present

- Emphasis:** Data Analytics & Machine Learning, Entrepreneurship and Management (ELITE)
- Relevant Courses:** Data Science and Statistics, Management Consulting, Applications of NLP, AI in Finance, Operations Research for Engineering Management, Deep Learning | **GPA:** 3.8/4

❖ B. Tech, Industrial Engineering | College of Engineering Trivandrum, KTU, India

August 2017 - June 2021

- Relevant Courses:** Financial Management, Operations Research, Data Analysis, Supply Chain and Logistics Management, System Simulation and Dynamics, Process Management | **CGPA:** 8/10

❖ Awards & Certificates:

Generative AI and Large Language Models –IIMB (Gold Certificate: 90%) (2024) | AWS Certified AI Practitioner (2024), AWS Certified Cloud Practitioner (2023) | Microsoft Certified Azure Data Scientist Associate (2024)
